

## Lab-9 Instructions

Step 1: Track who is tracking you online

Install or add a browser add-on Disconnect. This add-on is available for Google Chrome, Mozilla Firefox and Opera browsers.

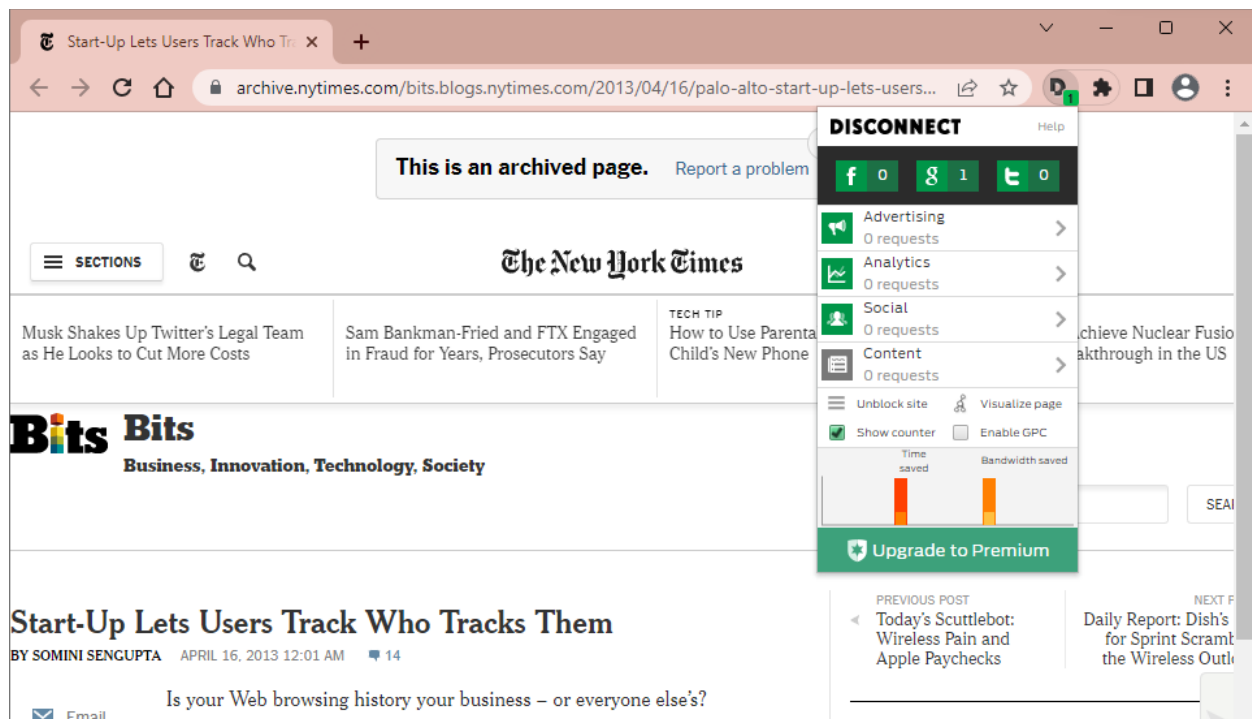

After installing the extension, visit the following web sites and check who is tracking you online with the Disconnect tool.

Website 1: 🗞 The New York Times

Visit the NYT website and see what Disconnect reports!

Sample results

Screenshot Disconnect 2

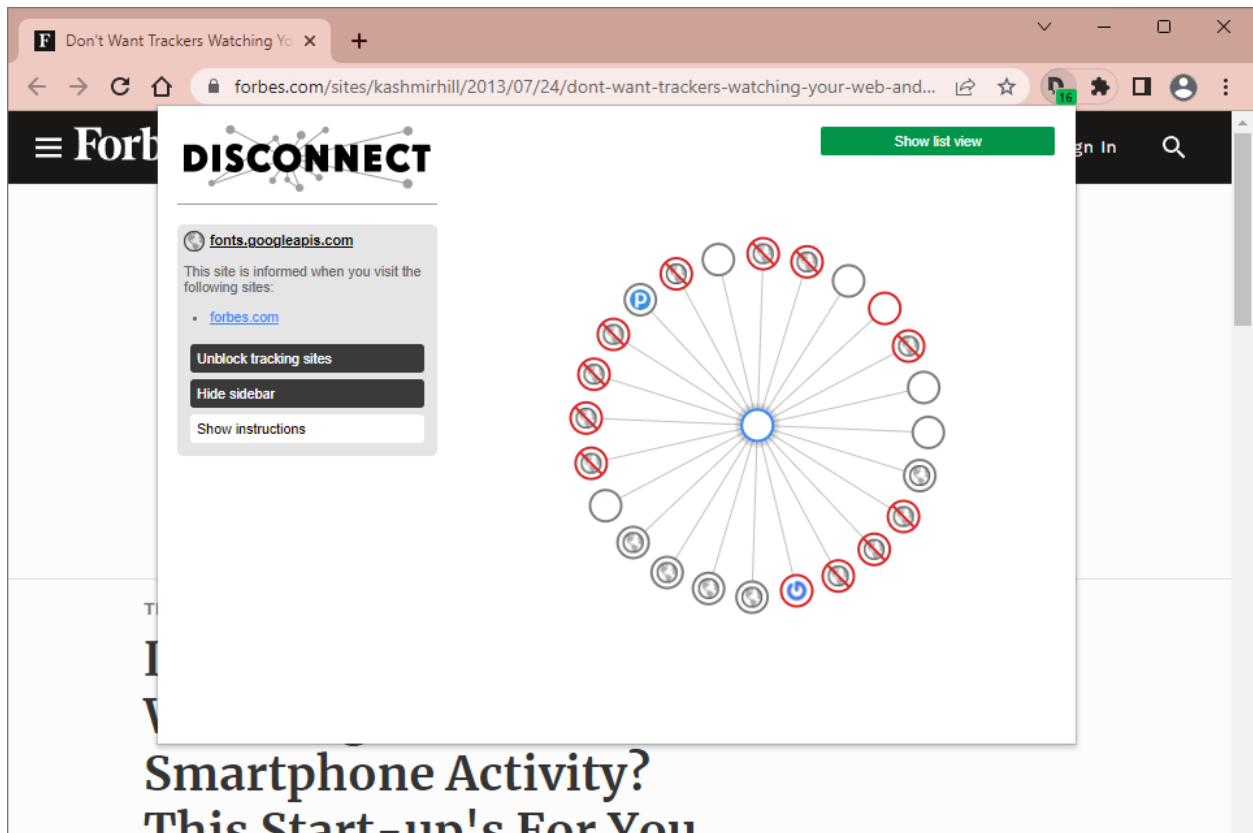

Website 2: 📰 Forbes

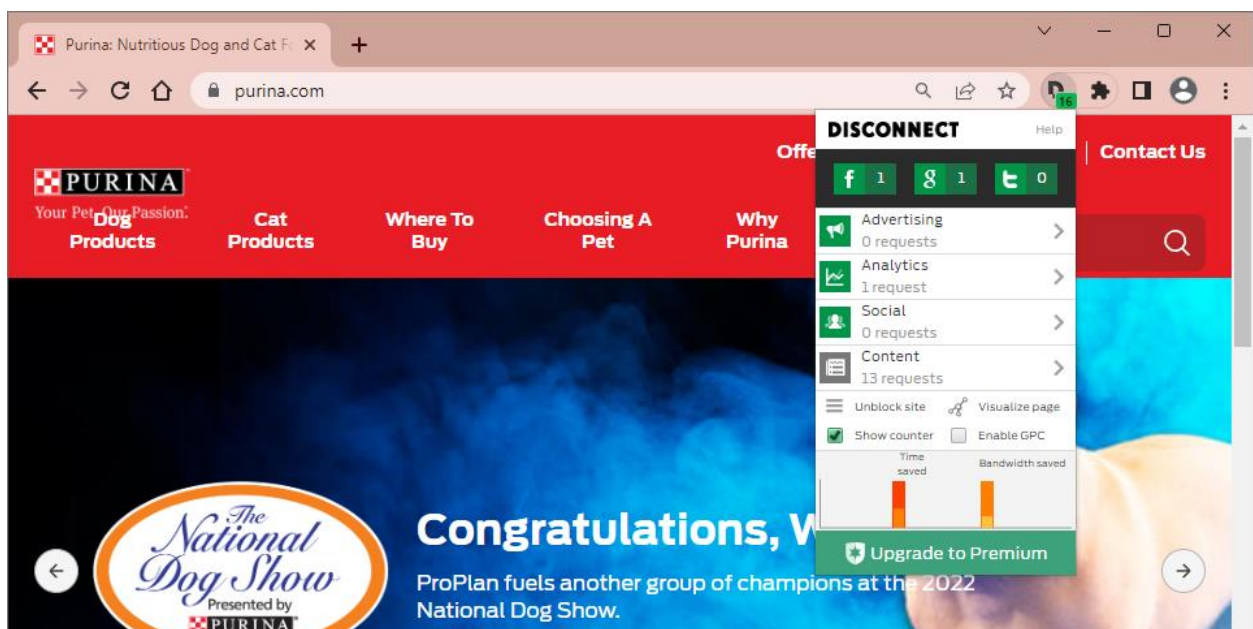

This time, try viewing Disconnect's report for Forbes via the "Visualize page"

Sample results

Screenshot Disconnect 2

Website 3:  Purina  
 Preview!  
 Screenshot Disconnect 3

## Which website had the most trackers? Why do you think that is?

Step 2: Identify who is looking over your shoulder

After playing around with Disconnect, in this step, we will use Blacklight to inspect websites and reveal the user-tracking technologies that these websites use.

Go to Blacklight - The Markup and input the following websites and check the Inspection Result:

 The New York Times

 Forbes

 Purina
